SUMMARY

I am a Computer Engineering graduate with strong academic background and hands-on experience in full-stack web development. Skilled in building scalable web applications using Python, Django, Django REST Framework, PostgreSQL, JavaScript, Tailwind CSS, Docker, and GitHub Actions. Experienced in developing RESTful APIs, role-based dashboards, admin panels, and responsive user interfaces, with a focus on clean design and deployment-ready solutions. Adaptable and detail-oriented, with a strong ability to work under deadlines and collaborate effectively. Eager to contribute to a dynamic software development environment while continuing to learn and grow professionally.

PROJECT

Personal Portfolio

[Github](#)

[Live](#)

- Developed a full-stack Django and PostgreSQL web app with session auth and a custom CRUD admin dashboard.
- Designed a mobile-responsive glassmorphism user interface with dynamic particle animations and interactive UI components.
- Containerized the application with Docker and automated testing and code-linting workflows using GitHub Actions.

Smart University Management System

[Github](#)

[Live](#)

- Built a full-stack university portal using Django and PostgreSQL with JWT auth and custom dashboards for students, teachers, and admins.
- Integrated AI features including an academic chatbot, a plagiarism checker, and a tool to flag at-risk students for teachers.
- Created a course advising and enrollment workflow, along with a custom command to parse and map complex class schedules from JSON routine data.

Soulspeak

[Github](#)

[Live](#)

- Built a full-stack peer-to-peer emotional support platform using React, Node/Express, and MongoDB with secure JWT authentication and specialized views for members, companions, and admins.
- Developed a real-time chat system powered by Socket.io and designed an interactive training module with an automated assessment questionnaire to vet and qualify support companions.
- Implemented safety and moderation features, including a user-generated reporting workflow, Nodemailer-based email verification, and an admin dashboard to handle content moderation and account suspensions.

EDUCATION

Bachelor of Computer Science & Engineering

Jan 2022 – Jan 2026

Brac University

- Final CGPA: 3.73

KEY SKILLS

- Python Programming
- Web Development (Django, JavaScript, HTML, CSS)
- SQL / MongoDB
- Data Analysis & Visualization (Pandas, Matplotlib, Excel/Google Sheets)
- Version Control (Git & GitHub)
- Problem-Solving & Critical Thinking
- Project Planning & Organization
- Leadership & Teamwork
- Time Management & Adaptability

LANGUAGE

- English
- Bangla
