

SUMMARY

Computer Engineering graduate from BRAC University with a strong academic foundation and practical experience in full-stack software development. Skilled in building scalable, production-ready applications using Python, Django, Django REST Framework, PostgreSQL, JavaScript, Docker, and GitHub Actions. Hands-on experience developing RESTful APIs, secure authentication systems, database-driven applications, and responsive user interfaces, with a focus on performance, maintainability, and user experience. Complemented by research experience in machine learning and cybersecurity, enabling a strong analytical approach to solving complex technical challenges. Recognized for quickly learning new technologies, taking ownership of projects, and collaborating effectively within teams. Eager to contribute to innovative software products while continuing to grow as a software engineer.

PROJECT

Smart University Management System

[Github](#) [Live](#)

- Built a full-stack university portal using Django and PostgreSQL with JWT auth and custom dashboards for students, teachers, and admins.
- Integrated AI features including an academic chatbot, a plagiarism checker, and a tool to flag at-risk students for teachers.
- Created a course advising and enrollment workflow, along with a custom command to parse and map complex class schedules from JSON routine data.

Soulspeak

[Github](#) [Live](#)

- Built a full-stack peer-to-peer emotional support platform using React, Node/Express, and MongoDB with secure JWT authentication and specialized views for members, companions, and admins.
- Developed a real-time chat system powered by Socket.io and designed an interactive training module with an automated assessment questionnaire to vet and qualify support companions.
- Implemented safety and moderation features, including a user-generated reporting workflow, Nodemailer-based email verification, and an admin dashboard to handle content moderation and account suspensions.

Personal Portfolio

[Github](#) [Live](#)

- Developed a full-stack Django and PostgreSQL web app with session auth and a custom CRUD admin dashboard.
- Designed a mobile-responsive glassmorphism user interface with dynamic particle animations and interactive UI components.
- Containerized the application with Docker and automated testing and code-linting workflows using GitHub Actions.

EDUCATION

Bachelor's in Computer Science and Engineering

Jan 2022 – Jan 2026

Brac University

- CGPA: 3.73

KEY SKILLS

Languages: Python, JavaScript, SQL**Frameworks:** Django, Django REST

Framework, React, Node.js,

Express, FastAPI, Flask

Databases: PostgreSQL, MongoDB**Tools:** Git, GitHub Actions, Docker, Linux, Nginx, Redis**Libraries:** Pandas, NumPy, Matplotlib, PyTorch,

Scikit-learn, Celery

Soft Skills

- Problem Solving
- Team Collaboration
- Communication

Research & Publication

A Cross-Dataset Based Zero-Day Intrusion Detection System by Integrating Siamese Network and Reinforcement Learning

- ICT Express, Vol. 12(3), 2026
- DOI: [10.1016/j.ict.2026.05.001](#)

LANGUAGE

- English
- Bangla
